

SUMMARY STATEMENT

Versatile Full-Stack Developer and DevOps Engineer with extensive experience in building and optimizing high-performance e-commerce platforms. Skilled in ReactJS, TypeScript, and Golang, with a strong focus on serverless architectures and cloud services. Proficient in AWS tools for secure authentication, payment processing, and content delivery. Experienced in managing cloud infrastructure using Terraform, emphasizing scalability, reliability, and performance. Demonstrates strong abilities in Agile project management, CI/CD, and infrastructure as code (IaC). Known for strategic problem-solving, fostering collaborative team environments, and continuously learning and adapting to new technologies and methodologies.

PROFESSIONAL EXPERIENCE

Sussman Shank, LLP

Information Technology Support Specialist (2020 - Sept. 2023)

- Maintained and updated knowledge base and documentation of common issues, resolutions and troubleshooting procedures
- Incident Reporting and Management: Received and document reports of security incidents or system malfunctions from end users.
- Primary point of contact for end users when they encounter technical issues or have IT-related inquiries
- Work closely with the System Administrator to communicate and coordinate system maintenance activities, including software updates, patches and hardware upgrades.

TJ Prohammer Photography (2019 - 2024)

Full Stack Developer / DevOps Engineer

- Engineered a responsive e-commerce platform using ReactJS and TypeScript, optimized for showcasing and selling nature photography, with a focus on performance and user experience.
- Developed and deployed serverless backend solutions with AWS Lambda (Golang) and AWS API Gateway, enhancing system scalability and reliability.
- Integrated AWS Cognito for secure authentication, VPC peering with MongoDB Atlas for robust database connectivity, and AWS Secrets Manager for sensitive data handling.
- Implemented Stripe API for secure payment processing and utilized AWS CloudFront for optimized content delivery, while managing cloud infrastructure using Terraform.

The Alpine Studio (2022-Current)

Full Stack Developer / DevOps Engineer

- Architected and deployed a robust, scalable infrastructure for an e-commerce platform and admin portal on AWS, utilizing services such as Lambda, API Gateway, DynamoDB, and S3.
- Developed the application backend using TypeScript and Golang, ensuring high performance and maintainability.
- Integrated Stripe API for secure payment processing, enhancing transactional capabilities and user experience.
- Leveraged Terraform for infrastructure as code (IaC), optimizing deployment strategies and reducing operational costs.
